

# HOWDEEP

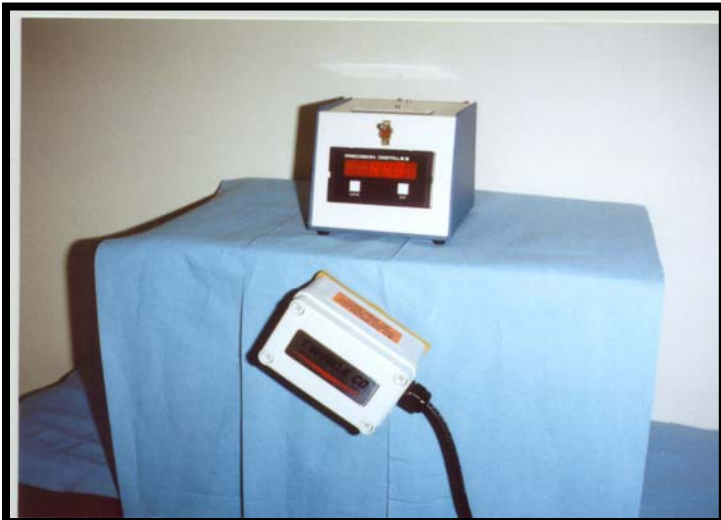

## Electronic Depth Gauge

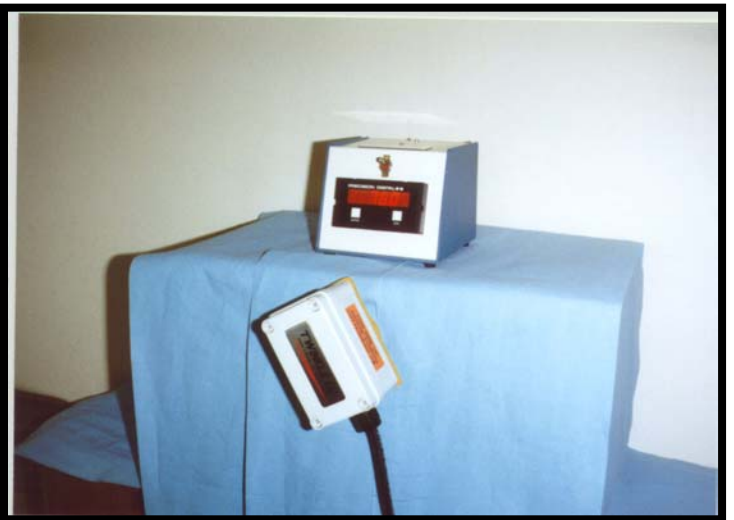

*HOWDEEP display with signal brick level and indicating 0.0 feet digging depth.*

*HOWDEEP display with signal brick shown with a standard size can of spray paint.*

*HOWDEEP display with signal brick tilted 45 degrees and indicating 44.9 feet digging depth.*

*HOWDEEP display with signal brick tilted 60 degrees, indicating 76.0 feet digging depth.*

Twinkle Co HOWDEEP electronic depth gauge eliminates the guesswork of how deep you are dredging. The HOWDEEP system eliminates the need for and problems associated with hoses being torn loose or air pressure systems being plugged with debris. The HOWDEEP signal brick quickly and easily mounts on your ladder with extreme duty magnets. The HOWDEEP system is factory programmed and installation of the HOWDEEP system usually takes only 10-15 minutes. The HOWDEEP depth signal can also be recorded on a Data Logger. Increase operator and management knowledge by installing a Twinkle Co HOWDEEP system today!
